

# “GREEN VERTICAL GARDEN COMPANY”

Greening the world one wall at a time

## GVGC BESPOKE SYSTEM

The 1,300cc Plant Containers are installed onto stainless steel weldmesh 50 x 50 x 3 mm  
36 plant container per m<sup>2</sup>, a modified growing medium is used.  
Drip irrigation is installed so that each plant has its own dripper

**J Crew** - store in NEW YORK - just planted as an indoor display

The same system is used in 4 stores in London UK

Using the 1,300cc plant container enables the use of larger plants, immediately giving the Vertical garden a more mature look from day one.  
The plants can be changed at any time by unclipping the plant container from the weldmesh
